

**Washington State
Department of Transportation**

Transportation Equipment Fund
Rental Rates

Rates Effective: 1 July 2005 thru 30 June 2006

Fiscal Year 2006

Revision 4

Revised September 19, 2005; Effective September 1, 2005

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Foreword:

The information and rental rates reflected in this document apply only to OTEF inventoried items. It does not apply to:

- ✓ Private contractors bidding or working on state contract jobs.
- ✓ Vehicles and equipment rented or leased from private companies.

The agency Equipment Administration Office (EAO) is responsible for formulating and soliciting approval for Transportation Equipment Fund (TEF) Financial Business Plans and supporting rental rates. Comments and questions regarding the contents herein should be directed to Jeff Schroeder, at 705-7885.

RCW 47.08.120 established the Transportation Equipment Fund (TEF) in 1935 as a revolving fund.

This means that TEF receives no biennial legislative funding appropriation to conduct business. Rather, the RCW stipulates that the program will be funded by rental charges levied on vehicle and equipment users; and charges for services, supplies and materials sold.

The law authorizes TEF to conduct business with any federal, state, county or city political subdivision or governmental agency; including school and fire districts.

Rental Rates are set to support the program's agency approved Financial Business Plan:

TEF is required to prepare six-year Financial Business Plans; have them approved internally; and submit them to the state Office of Financial Management (OFM) at appropriate times. These approved Plans are TEF's "budget."

Equipment rental rate adjustments occur after the approval of Financial Plans; and the rates are set at the equipment subclass level to:

- ✓ Provide adequate revenue to deliver approved annual service expenditures.
- ✓ Make each equipment subclass as self-sustaining as possible.

In a nutshell, if the approved Financial Plan expenditure level for a particular fiscal year is \$40 million, the program's revenue must also be \$40 million.

Because the approved six-year Plan is impacted by inflation and other financial events, equipment rental rates are usually adjusted annually to keep expenses and revenue aligned. While inflation usually drives rates higher; occasionally annual rental rates may be lowered for various reasons.

TEF staff endeavor to maximize revenue from sources other than equipment rent, in order to minimize the financial impact on supported programs. Currently, about 10% of program revenue comes from other sources, such as the sale of aged equipment and fuel. As a result, rental rates must be set to collect about 90% of the program's funding needs.

The most current approved six-year *Financial Plan* may be viewed on TEF's web site, at <http://wwwi.wsdot.wa.gov/MaintOps/equipment/PDF/businessplan.pdf>

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Each subclass must be self-sustaining:

Not only is this a sensible business practice; but also the Federal Highway Administration (FHWA) reviews and approves TEF rental rates to ensure that they are applied in an equitable and consistent manner across the entire agency inventory. Additionally, whether or not OTEF rates are over or under collecting from the various equipment subclasses is a focus item during program audits.

As expenses are incurred, they are recorded in the *Fleet & Equipment Management System (FEMS)*, at the individual unit level. Recorded expenses fall into two broad Financial Plan categories:

- a. *Operating:* Includes a broad range of expense items such as:
 - ✓ Program labor
 - ✓ Repair parts and lubricants
 - ✓ Equipment maintenance services performed by external sources
 - ✓ Fuel
 - ✓ Fees charged by other entities for such items as tort claims (equipment insurance); equipment purchasing and disposal processing; and legal support
 - ✓ TEF staff travel, per diem, training and conferences.
 - ✓ Vehicles and shop equipment used by TEF to administer the program.
- b. *Capital:* Expenses for replacing equipment in *Active* inventory status on a level, cyclic basis as determined by the subclass' established Economic Life.
 - ✓ Each Class' Economic Life is reflected on the *Rental Rates Table* beginning on page 5.
 - ✓ A year's level purchase is determined by dividing the total number of active units in a particular subclass by the subclass' Economic Life.
For example, a subclass with 400 active units, and an Economic Life of 10 years would require 40 units to be replaced each year (400 total units ÷ 10 years = 40 units replaced annually).

These two expense categories are thoroughly analyzed at the equipment subclass level to determine rental rate adjustments:

- a. The rent must obviously be increased for a subclass whose analysis of historical *Operating* data reveals that it experiences an annual expenditure of \$200,000; but pays only \$150,000 rent.
- b. If the analysis indicates that the purchase price will be lower for items in the subclass, in the upcoming year, the rent covering this component would obviously be lowered.

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

All equipment pays a flat hourly rental rate to cover all expenses incurred:

Effective 1 July 2005, the 15% of subclasses on a dual rate methodology (assigned time rent and use time rent) were converted to a flat hourly rate structure.

This flat rate structure makes it much easier for appropriated programs to predict vehicle and equipment expenses for biennial budget preparation. It also aids OTEF in more accurately predicting and tracking rental revenue. Rental rates charged cover all expenses incurred by OTEF inventoried units; including maintenance and fuel.

While the program now collects rent on an assigned time only basis, there is a reduced rental rate for equipment that has been replaced, but is being retained by the user for short duration critical needs. These units no longer contribute towards capital replacement as they have already been replaced, and therefore the rental rate for those units is to cover operating costs only.

Equipment status as recognized in the FEMS determines which rental rate is to be applied to each unit:

Units in the following FEMS status do not have rental charges applied;

(B)udgeted: These are units in the beginning stage of the purchasing cycle. The units do not actually exist at this time, the unit number is a placeholder for tracking a unit that will be ordered.

(O)rdered: These units are on order, and are being built or shipped from the manufacturer.

(I)nactive: These units have been received and paid for, and are being prepared for service and subsequent delivery to the customer for use.

(D) –Sale: These units have been replaced and are in the beginning stages of the disposal process

(S)old: These units have been disposed.

Units in the following FEMS status do have rental charges applied;

(A)ctive: These units are actively working for the department and are eligible for replacement at a future date. The rental rate applied to these units is shown in the rental table column titled 'Active Rent'

(D) –Flag: These units are in the process of being replaced (there are 'new' units in status B, O, or I.) The rental rate applied to these units is shown in the rental table column titled 'Active Rent'.

(D) – Final: These units have been replaced, but are being retained by the user for short duration critical needs. These units no longer contribute towards capital replacement as they have already been replaced, and therefore the rental rate for those units is to cover operating costs only. The rental rate applied to these units is shown in the rental table column titled 'D-Final Rent'.

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Rent is calculated on an 8-hour workday basis; and it is billed on a monthly basis.

Actual monthly hours vary with the number of workdays in each month. However, there are approximately 168 work-hours in a month on average; and about 2,008 work-hours in a fiscal year.

Seasonal units in rental category *S* (Summer) or *W* (Winter) are charged rent only six months of each year (approximately 984 Winter work hours or 1,020 Summer work-hours).

Units that have been replaced, but authorized to be retained for short-term project use, are not charged the *Capital* component of rent.

With the above information in mind, rental rates are formulated for each equipment subclass in 3 steps, as follows:

Step 1: $\text{Historical Total Annual Operating Cost for a subclass} \div \text{Fiscal Year's Work-Hours} \div \text{Total Units in Subclass} = \text{Historical Hourly Operating Costs}$. This value is then evaluated against what the equipment fleet make up is projected to be in the upcoming fiscal year; and what operating cost changes are projected to occur in the upcoming fiscal year. This projection provides an Anticipated hourly operating cost per unit for rental rate development.

Step 2: $\text{The anticipated cost of purchasing a unit in next years dollars} \div \text{the subclass economic life in years} \div \text{Fiscal Year's Work-Hours} = \text{the } \underline{\text{Anticipated hourly replacement cost per unit}}$ for rental rate development.

Step 3a: $\text{Anticipated hourly operating cost per unit} = \text{Total Hourly Rental Rate for 'D-Final' units}$

Step 3b: $\text{Anticipated hourly operating cost per unit} + \text{Anticipated hourly replacement cost per unit} = \text{Total Hourly Rental Rate for 'Active' and 'D-Flag' units}$.

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Rental Categories:

The *Fleet & Equipment Management System* uses the following seasonal rental category codes when calculating and billing monthly rental charges. The appropriate code is annotated for each subclass on the *Rental Rates Table* below.

- Blank:* Eight hours of rent is charged for every workday throughout the year.
- W:* Eight hours of rent is charged for every workday during 1 October through 31 March
(6 months - Winter).
- S:* Eight hours of rent is charged for every workday during 1 April through 30 September
(6 months - Summer).

Key changes that occurred in this rental table, compared to the previous edition:

- ✓ Equipment subclasses were added to reflect new types of units, and to better define unit types
- ✓ Obsolete equipment subclasses were removed.
- ✓ Subclass rates were adjusted to support the approved Financial Plan, and make each subclass self-sustaining
- ✓ The 15% of subclasses on a dual rate methodology were converted to a single rate; placing 100% of equipment subclasses on single rate structure.
- ✓ Seasonal rental categories were changed to reflect new single rate structure, and align with the coding protocol in the Fleet & Equipment Management System:

Seasonal Code Conversion

<i>Old Table Code</i>	<i>New Table Code</i>	<i>FEMS code</i>
<i>1 & 4</i>	<i>(Blank)</i>	<i>(Blank)</i>
<i>3 & 6</i>	<i>Summer</i>	<i>SMMR</i>
<i>2 & 5</i>	<i>Winter</i>	<i>WNTR</i>

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Revision information:

Revision 1;

Created subclass 0205

Adjusted rental rates for subclass 2166

Revision 2;

Created Wireless Subclass for the Ascend (re-banded) user and infrastructure radios; subclasses established are 2480, 2481, 2482, 2483, 2484, 2485, 2486, 70W11, and 70W16

Revision 3;

Adjusted rental rates for subclass 2350

Revision 4;

Adjusted rental rates for subclasses 1004, 1008, 1014, and 1015

43 - Class	Continued					
4364	Tension/Compression Steel Tester; Medium; 200-400K	20			\$0.72	\$0.04
4365	Static Load Compression Machine	20			\$0.50	\$0.04
4366	Condition Environmental Chamber	20			\$0.48	\$0.03
50 - Class	Attachments for Motor Grader & Front End Loader					
5002	Scarifier	15			\$0.11	\$0.00
5003	Plow; V or Straight	15		Winter	\$0.31	\$0.04
5005	Wing Plow	15		Winter	\$0.94	\$0.26
5006	Sloper Blade	15			\$1.54	\$0.63
5007	Montana Asphalt Topper (MAT)	15			\$0.42	\$0.16
5008	Plow; V; Folding	15		Winter	\$1.80	\$0.33
5010	Mower Head; Drum; Fixed Knife; Skid Loader Mtd	15			\$0.54	\$0.09
5011	Slot Cutter; Skid Steer Mounted	15			\$0.20	\$0.06
5021	Forks	15			\$0.18	\$0.00
5022	Broom; with Bucket	15			\$0.20	\$0.00
5023	Planetary Drive Auger	15			\$0.06	\$0.00
5031	Post Driver	15		Summer	\$0.50	\$0.17
5032	Underguardrail Sidedozer	15			\$0.29	\$0.09
5034	Planer	15			\$0.28	\$0.01
5040	Front Loader Remote Control Unit (TAMER)	15			\$1.78	\$0.00

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Subclass	Description	Economic Life (Years)	Use Life -- Miles; Class 11-13 Hours	Rental Category	Active Rent	D-Final Rent
70 - Class	Wireless Communication Infrastructure Equipment					
7001	Site; Wireless Communication; without power generator. Intra-fund rent paying units; Regional designators applied to the site number.	10			\$6.90	\$6.90
NOTE:	These subclasses are for inventory purposes only, and are attached to a 70-01 unit; and all have a 'W' designator instead of a regional designator. This precludes program staff from having to re-class or re-number these attachments/components whenever moved from one site to another.					
70W10	800 Mxh Repeater Individual repeaters from 24-21, 24-22, 24-23, 24-24, 24-25, and 24-50					
70W11	800 Mxh Repeater; Rebanded					
70W15	Cross Band Repeater From 2452					
70W16	Cross Band Repeater; Rebanded					
70W21	960 Mhz Microwave From 2430					
70W22	2 Ghz Microwave From 2431					
70W23	6 Ghz Microwave From 2432					
70W24	10 Ghz Microwave From 2435					
70W25	18 Ghz Microwave From 2433					
70W26	23 Ghz Microwave From 2434					
70W31	900 Mhz Spread Spectrum Device					
70W33	2.4 Mhz Spread Spectrum Device					
70W35	4.9 Mhz Spread Spectrum Device					
70W37	5.8 Mhz Spread Spectrum Device					
70W40	Low Band Base Station From 2440					
70W41	Low Band Repeater From 2441					
70W44	High Band Base Station From 2444					
70W45	High Band Repeater From 2445					
70W46	UHF Band Base Station From 2446					
70W47	UHF Band Repeater From 2447					
70W49	Dispatch Console From 2449					
70W50	Remote Network Terminal					
	From 2451 that isn't going to 70W55					
70W55	Dispatch Network Terminal					
	From 2451 that isn't going to 70W50					
70W60	Remote Radio System Monitoring Unit (CPU) From 2455					

Operations Transportation Equipment Fund -- FY06 Equipment Rental Table

Subclass	Description	Economic Life (Years)	Use Life -- Miles; Class 11-13 Hours	Rental Category	Active Rent	D-Final Rent
77 - Class	OTEF Shop Equipment Inventory Purposes					
7701	Heavy Vehicle Lift; Above Ground; Portable	20			\$0.60	\$0.60
7702	Light Vehicle Lift; Above Ground	20			\$0.32	\$0.32
7703	Portable Engine Hoist	20			\$0.13	\$0.13
